

Preceptorship supporting you at the start of your nursing career

Here at Croydon Health Services, we want to do everything we can to help get your career off to a flying start as a Croydon nurse.

To help your transition from a newly qualified nurse into an experienced member of nursing staff, we have developed a nine-month preceptorship programme.

This programme is responsive to your individual needs whilst supporting the needs of your clinical areas, helping to support you to build your practical nursing skills and knowledge in a working environment.

You will be allocated a preceptor to mentor and work with you in identifying learning objectives and you will attend a series of study days to develop your knowledge, confidence and additional clinical skills.

Topics covered in the preceptorship include:

- Intravenous Drug Administration
- Phlebotomy
- Cannulation
- Communication Skills
- Working as a part of a multi-disciplinary team
- Professionalism
- Prioritisation and delegation

Your preceptor will also be able to provide guidance and support for you in partnership with the Practice Education Team, to assist you in making wider choices about your future career and help you explore the different opportunities open to you as a nurse at Croydon Health Services.

The programme is supported by our Preceptorship and Overseas Nurses Coordinator and the Practice Education Team. You can contact the team for more information on 020 8401 3000 ext. 4201/4872.

Come to Croydon and take advantage of this first step on a ladder of career development opportunities that we can offer you.
