

GASTROINTESTINAL MEDICINE AND SURGERY

Clinical Fellow in Emergency General Surgery

ST3-5 level (Nodal point 4)

Full Time – 47.5hrs

Fixed Term – 12 months

Applications are invited for Trust Doctors at ST3-5 level (Nodal Point 4) within Gastrointestinal surgery in the directorate of Gastrointestinal Medicine and Surgery from 2 October 2024.

The post is based at St Thomas' Hospital for 12 months. The post involves active involvement in a busy emergency general surgery team including ambulatory emergency general surgery clinics and dedicated emergency theatre sessions and participates in the daytime registrar rota. Time in elective general surgery would be focused on high-volume low-complexity day and short-stay surgery and associated clinics. Exposure to main theatre including complex tertiary surgery would also be available.

Upper GI at St Thomas's is the designated the regional unit for gastro-oesophageal malignancies and also provides surgery for upper gastrointestinal benign disease. There is also a tertiary endocrine surgical service for thyroid, parathyroid and adrenal disease.

Lower GI Unit has special interests in inflammatory bowel disease surgery, locally advanced, recurrent rectal cancer resection and laparoscopic and robotic surgery and has a tertiary referral pelvic floor unit, with regular MDMs held in each of these subspecialties. We have regular departmental teaching, access to courses and a simulation centre on site.

The post holder will have an assigned educational supervisor and there will be ample opportunities to increase surgical experience and participate in research projects, teaching, simulation and audit.

This job does not carry Postgraduate Dean's approval.
